I request and consent to the performance of chiropractic adjustment and other chiropractic procedures including various modes of physical therapy, rehabilitation, and diagnostic X-rays on myself or the patient named above for whom I am legally responsible, by the doctor of Bont Chiropractic LLC. I Understand and am informed that, like any health care related procedure, there are some risk to treatment. Risks include, but are not limited to fractures, disc injuries, strokes, dislocations, and sprains. I understand that chiropractic is not an exact science and that every patient responds to care differently, therefore, reputable practitioners cannot fully guarantee results. I acknowledge that no guarantee or assurance has been made by anyone regarding the chiropractic treatments that I have requested and authorized. I have had the opportunity to read this form and ask questions. My questions have been answered to my satisfaction.

Dr. Steven S Bont D.C. * Dr. Kal H Gerber D.C.

I, _____ the undersigned patient, understand that as part of my healthcare, this practice originates and maintains health records describing my health history, symptoms, examinations and test results, diagnoses, treatment, and any plans for future care or treatment. I understand that this information serves as:

- A basis for planning my care and treatment
- A means of communication among the many health professionals who contribute to my care
- A source of information for applying my diagnosis to my bill
- A means by which a third-party payer can verify that services billed were provided
- A toll for routine healthcare operations such as assessing quality and reviewing that competence of healthcare professionals, and
- A marketing tool solely by Bont Chiropractic in the form of newsletters, mailings, etc.

I understand and have been provided with a *Notice of Information Practices* that provides a more complete description of information uses and disclosures. I understand that I have the right to review the notice prior to signing this consent. I understand that the organization reserves the right to change its notice and practices and, prior to implementation, will mail a copy of any revised notice to the address I've provided. I understand that I have the right to request restrictions as to how my health information may be used or disclosed to carry out treatment, payment, or health care operations and that the organization is not required to agree to the restrictions requested. I understand that I may revoke this consent in writing, except to the extent that the organization has already taken action in reliance thereon.

I wish to have the following restrictions to the use or disclosure of my health information:

I fully understand and **Accept / Decline** the terms of this consent.

PATIENT NAME: _____ Date: _____

Please read this entire document prior to signing it. It is important that you understand the information contained in this document. Please ask questions before you sign if there is anything that is unclear.

The nature of the chiropractic adjustment.

The Primary treatment I use as a doctor if chiropractic is spinal manipulative therapy. I will use that procedure to treat you. I may use my hand or a mechanical instrument upon your body in such way as to move your joints. That may cause an audible "pop" or "click," much as you have experienced when you "crack" your knuckles. You may feel a sense of movement.

Analysis / Examination / Treatment ** Patient must initial EACH procedure they are consenting to be performed.**

As part of the analysis, examination, and treatment, you are consenting to the following procedures:

- | | | |
|---|---|---|
| <input type="checkbox"/> Spinal Manipulative Therapy | <input type="checkbox"/> Palpation | <input type="checkbox"/> Vital Signs |
| <input type="checkbox"/> Range of Motion Testing | <input type="checkbox"/> Orthopedic Testing | <input type="checkbox"/> Basic Neurological Testing |
| <input type="checkbox"/> Muscle Strength Testing | <input type="checkbox"/> Postural Analysis | <input type="checkbox"/> EMS |
| <input type="checkbox"/> Ultrasound | <input type="checkbox"/> Hot / Cold Therapy | <input type="checkbox"/> Radiographic Studies |
| <input type="checkbox"/> Other (Please explain) _____ | | |

The material risks inherent in chiropractic adjustment.

As with any healthcare procedure, there are certain complications which may arise during chiropractic manipulation and therapy. These complications include but are not limited to: fracture, disc injuries, dislocations, muscle strain, cervical myelopathy, costovertebral strains and separations, and burns. Some types of manipulations of the neck have been associated with injuries to the arteries in the neck leading to or contributing to serious complications including stroke. Some patients will feel some stiffness and soreness following the first few days of treatment. I will make every reasonable effort during the examination to screen for contraindications to care; however, if you have a condition that would otherwise not come to my attention, it is your responsibility to inform me.

The Probability of those risks occurring

Fractures are rare occurrences and generally result from some underlying weakness of the bone which I check for during the taking of your history and during examination and x-ray. Stroke has been the subject of tremendous disagreement. The incidences of stroke are exceedingly rare and are estimated to occur between one in one million and one in five million cervical adjustments. The other complications are also generally described as rare.

The availability and nature of other treatment options

Other treatment options for your condition may include

- Self-administered, over-the-counter analgesics and rest
- Medical care and prescription drugs such as anti-inflammatory, muscle relaxants and pain killers
- Hospitalization
- Surgery

If you chose to use one of the above noted "other treatment" options, you should be aware that there are risks and benefits of such options and you may wish to discuss these with your primary medical physician.

The risk and dangers attendant to remaining untreated.

Remaining untreated may allow the formation of adhesions and reduce mobility which may set up a pain reaction further reducing mobility. Over time the process may complicate treatment making it more difficult and less effective the longer it is postponed.

DO NOT SIGN UNTIL YOU HAVE READ AND UNDERSTAND THE ABOVE. PLEASE CHECK THE APPROPRIATE BLOCK AND SIGN BELOW.

I have read () or have had read to me () the above explanation of chiropractic adjustment and related treatment. I have discussed it with Dr. Steven Bont and have had my questions answered to my satisfaction. By signing below I state that I have weighed the risks involved in undergoing treatment and have decided that it is in my best interest to undergo the treatment recommended. Having been informed of the risks, I hereby give my consent to that treatment.
